Career Objective: To contribute to practical software development initiatives by applying my programming and technical skills, while gaining hands-on exposure to real-world industry practices and continuously improving my technical proficiency.

Project

Major Project:

Merc – Video Player App (React + YouTube API)

Built a video player web application named Merc using React and integrated with the YouTube API to fetch and display video content. This project emphasizes asynchronous data handling, API integration, and dynamic UI updates within a modern JavaScript framework.

Tech Stack: **React** (JavaScript), **YouTube API**, **CSS**, **HTML**

Minor Project:

Get Fit Club – Gym Website (Front – End)

Developed a responsive and interactive gym web application named Get Fit Club using React. The project was built with *Create React App* and focuses on delivering a modern fitness club interface tailored for users interested in gym services and training programs. It showcases clean UI/UX design principles and leverages component-based architecture to ensure scalability and maintainability.

Tech Stack: **React** (JavaScript), **CSS**, **HTML**
